## PROJECTS

### Project Name – Movie-Mania [\[link\]](#):-

**Movie-Mania** is a responsive, single-page web application built with Angular and styled using Tailwind CSS. It integrates the TMDB (The Movie Database) API to provide users with real-time access to trending, popular movies. The app allows users to search for movies, view detailed information, and watch official trailers via YouTube embedding.

### Project Name – Mini-Ecommerce Web Application [\[link\]](#):- Description:

Developed a simple e-commerce website using Angular and JSON Server (Mock API) This project includes both seller and user functionalities.

#### Key Features:

- Seller Panel:**
  - Add new products with images, names, and prices
  - Edit and update existing product details
  - Delete products from the list
- User Features:**
  - Browse all available products
  - View product details
  - Add products to cart
  - Cart item count updates dynamically

#### Tech Stack:

- Frontend:** Angular, HTML, CSS
- Backend (Mock API):** JSON Server
- Other Tools:** Bootstrap for styling, Angular Routing for navigation

### Project Name – Chat-bot Application [\[link\]](#):-

- Description:**  
Built an interactive chat-bot application using Angular and Gemini API for real-time AI-powered responses. Implemented chat session management with features like New Chat, Delete Chat, and persistent message history.
- Designed a responsive and modern UI using Tailwind CSS, ensuring mobile-friendly experience.

**Tech Stack:** Angular, HTML, CSS, Tailwind CSS, TypeScript.
